Nine Candidates in Field for Five Vacancies

President Livett and Mayor Williams Appeal For Support of Miners Out on Strike

Financial support, if needed, for the striking miners of West Canadian Collieries Limited at Blairmore and Bellevue, and the Mohawk Bituminous Mines Ltd. was asked for at a meeting here on Sunday evening in the community hall, addressed by Robert Livett, president of District 18, United Mine Workers of America, and Mayor Enoch Williams, of Blairmore, chairman of the negotiating committee for the West Canadian miners.

Max Stigler, chairman of the meeting, stated the meeting had been called to place before the miners of Coleman the facts concerning the strike in order to give them a clear understanding of the cause.

President Livett gave in detail a review of the negotiations between the local committee, acting with the district officials of the U.M.W.A., and the officials of the coal companies. Under a ruling last year by provincial legislation the miners are to be paid in all Alberta mines by tonnage. In West Canadian and Mohawk Mines heretofore the men have been paid on the cubic measurement basis. It is claimed that by this method they have not been paid for the actual amount of coal mined, and they desire a rate on a net tonnage basis the same that is paid in the International and McGillivray mines in Coleman. Also pay for timbering and deadwork.

Mr. Livett asked for the support of Coleman miners, the men were fighting for a principle which they knew was fair. If conditions were imposed on them which would result in the lowering of the present standard of living, it would ultimately affect all other miners, for any standard of pay that was set up in one or two mines might easily be made the standard for other mines. It would apply to mines the workers of which were not affiliated with the U.M.W.A., and he reminded the audience that an effect of this was seen in the increased rate of payment recommended by the McGillivray commission last summer, which applied to all mines, though the fight for this increase was carried on by the U.M.W.A.

School Trustees Closing Meeting Cleans Up Business of Past Year ---Attendance Down in January

New Basis of Assessment for 1939 Announced by Department of Education.

A regular meeting of the Coleman school board was held on Tuesday evening to conclude the business of the school district before the election of new trustees next Monday. Present were Chairman Fraser, Trustees Sharp, Fleming and Chamberlain.

The minutes of the previous meeting, as well as the cash statement for January, were discussed and adopted. Principal Hoyle reported school attendance for the past month was only 85%, and that four teachers were absent at various times during that period. Flu was given as the reason.

A letter was received from Mr. E. D. Battum, returning officer at the municipal elections next Monday, informing the board that six nominations had been received for the five vacancies on the board caused by the expiry of terms of office of three trustees.

The West Canadian had stated that the average earnings of a contract miner last year were \$9.00 or a little more per day. But when it was considered that they only worked 120 days or a little more, it could be seen that the year's wages gave nothing more than a bare living. Company men would receive less than half if they worked the same number of days.

Mayor Williams addressed the meeting, stating that he had worked in the coal mines for 44 years, first in Nova Scotia, and since 1904 in Crow's Nest mines. He reviewed the strike in 1904, which was a struggle by the miners to have improved working conditions, and ever since there has been a continual effort to improve the lot of the workers. In those earlier days money came easily, but as competition developed, and more stringent mining regulations were put in effect, so did the struggle for the miner to obtain a decent standard of living become keener.

This present dispute was the culmination of a long controversy in the mines at Bellevue and Blairmore, over methods of payment for timbering and other work which should be paid for by the company. Concerning the proposal to return to work on a thirty days trial period in order to find a suitable rate to be paid for coal mined, he objected to it, because he believed that any rate arrived at would determine the standard for not only miners of West Canadian, but would ultimately be the rate for all other mines. The men wanted to be paid for the actual coal mined, and were determined to stand for what they considered was fair and just.

As long as he was in the labor movement, he would continue to advocate fair treatment for the workers. Despite his long years of employment in the coal industry, he owned little more than what he stood in, and on the present basis of earnings in Blairmore and Bellevue, there was little prospect for an improvement.

Both speakers were given an attentive, sympathetic hearing, and various questions were asked by members of the audience.

The Money You Spend Comes Back To You!

THE JOURNAL is a local industry, the product of which is turned out by workmen living here, paying taxes here and buying their clothing, household furniture, groceries, etc. from local stores. They practice reciprocity. The more workmen we employ and the greater amount of wages which would follow increased plant production would go back into local retail trading channels.

That's why it is Good Business to Advertise in The Journal and to Buy Your Printed Matter from a Printing Office which is proud of the work it turns out.

Nova Scotians Pursue Vigorous Policy Towards Developing Greater Market For Canadian Coal

NEW SLOGAN FOR MERCHANTS' Retail Association Develops Old Idea To Boost Business

Glace Bay, N.S. — "You buy our coal, we'll buy your manufactured goods," is to be the slogan of the local merchants in dealing with salesmen from upper Canada. It was decided at a recent meeting of the Glace Bay Retail Merchants' Association.

This move was decided, following considerable discussion of the coal situation, and is an effort on their part to do their bit to help economic conditions of Cape Breton. They will also send a petition to the provincial and federal governments, in which the association requests these bodies to see that the mines in Cape Breton receive steady operation. Drawing up of this petition will be in the hands of the executive. The document will be quite comprehensive and much time will be spent gathering facts and figures on the mines situation, with an effort to show a real argument as to why the collieries should work steady.

Two nations have recently turned to Saskatchewan for information on how to utilize deposits of lignite coal. They are Japan and Greece.

Fuel research engineers of the Department of Mines and Resources, Ottawa, report marked progress in the past fifteen years in the use of pulverized coal as a fuel in steam generating plants. More especially is this true, they state, of very large central station plants.

ANNOUNCEMENTS

On Thursday evening next, Feb. 16, St. Alban's Ladies' Guild will hold a bridge party in the parish hall, at which they invite all who can attend. The admission is 50c, and prizes for ladies and gents will be awarded. Refreshments served.

St. Paul's Ladies' Auxiliary will hold a St. Valentine's tea and sale in the club room, adjoining the church on Saturday, Feb. 18. A cordial invitation is extended to all. Tea 25c.

LOCAL NEWS

Red Door has reduced its taxes by two mills, the rate being the lowest in 20 years.

A daughter was born to Mr. and Mrs. Steve Penny on Thursday, February 2.

Mrs. M. Ironside, matron of Michel hospital, was the week-end guest of Mr. and Mrs. Norman Macaskay at Star Creek Ranch.

Rev. John R. Hague is spending the week at a conference of the clergy of the Diocese of Calgary, being held in that city, and will return on Saturday.

A. L. Davidson, though still suffering from lameness as the result of an accident at Christmas, is again on duty at the government vendor store.

Ninety-two years of age is a remarkable span of life, Mrs. Fred Cox's father having reached that age this week. For many years he resided in Saskatchewan, and later has been living with his daughter and her husband, Mr. and Mrs. Fred Cox, on Second Street.

Remember, the supplying of Canada's fuel requirement with Canadian coal means ten million dollars more in wages, forty thousand employed for eight months in the year. If only for self-interest, it means a tremendous home market for farmers, builders, miners, railroads, in fact all of us. Let us all help to help ourselves.—H. Ingreby, M.L.A., Drumheller Constituency.

Extension of the subvention provisions should prove of material value in aiding Crow's Nest coal to secure a worthwhile market in the Ontario territory. Western coal has been found very satisfactory by many large industrial users in the Ontario market, as well as domestic consumers, but it requires governmental assistance in order to offer the coal at a price comparable with competing fuels.—Western Canada Coal Review.

Daniel Fogin, believed to hold the record for mining the largest single piece of coal, ever mined, recently died at Ladysmith, B.C. Mr. Fogin went to North Wellington, coal mines in the '80s, and it was there he mined the "largest single piece of coal," which he exhibited at the World's Fair in Chicago. — Western Canada Coal Review.

COLEMAN AND BELLEVUE JUVENILES TIE

Playing at Bellevue on Tuesday, Feb. 7, Coleman juveniles were held to a 4-4 tie by a Bellevue team bolstered by four Hillcrest players.

Scoring was as follows: 1st Period: 1, Bellevue, Civatree (Rhodes); 2, Coleman, Fontana (Harry); 3, Coleman, Beddington (Fontana); 4, Bellevue, Rhodes (Paul). No penalties.

2nd Period: 5, Coleman, Beddington; 6, Coleman, Raymond (Kovacs). Penalties: Rhodes; 7, Bellevue, Civatree (Rhodes, Paul); 8, Bellevue, Rhodes (Civatree). Penalties: Smith, Mills.

Final score: Coleman 4, Bellevue 4. Coleman's line-up: Goal, Roy McLeod; defence, Ian Smith, Mike Harry, Roy Garrett; forwards: Milan Roy, Wilbert Raymond, Calvin Godfrey, Elvino Fontana, Henry Evans, Fred Beddington, Arthur White, John Ondrus, Jack Russell.

FEVER FROM INFECTED MILK

A case of undulant fever, which arises from Bang's disease, which is peculiar to cows and which has undergone long and patient investigation to find a preventative, is reported in a nearby B. C. town, where a patient has been ill for nearly six months. Milk from infected cows is the most frequent source of this disease, and it is reported that in the United States, where close watch and record has been made, that there are 120,000 cases at all times.

That is why Meadow Sweet Dairies Ltd. advocates the use of Pasteurized Milk which is delivered daily in the Pass towns. Telephone 138m if you wish daily delivery of milk or cream, or other dairy products.

Six Nominated for Three Vacancies on School Board, Three for Two on Council. Miners Enter Nominations ---One Business Man Nominated. Polling on Monday 10 a.m. till 7 p.m.

NOMINATIONS FOR MUNICIPAL AND SCHOOL ELECTIONS FOR COUNCIL

John Balloch, nominated by Robert Morris and E. Houghton; Ernest Houghton, nominated by W. Chapman and F. Anstrub; James R. Kerr, nominated by G. Pattinson and H. C. McBurney. Two to be elected.

FOR SCHOOLS

Neil Fleming, nominated by W. Fraser, Jr. and W. Lee; George Ford, nominated by W. L. Hayson and F. Anstrub; William Fraser, nominated by John Ramsey and Bob. Morris; Pedro Sharp, nominated by W. Fraser and J. Balloch; John Rogers, nominated by E. Houghton and C. D. Rogers; Ed. Woods, nominated by W. J. Williams and W. H. Hayson. Three to be elected.

Of the above, three former school trustees, Neil Fleming, P. Sharp and William Fraser, chairman, are seeking re-election, believing that their record merits the confidence of the ratepayers. Also seeking election to the board of trustees are three newcomers in the arena of municipal affairs, G. Ford, John Rogers and Ed. Woods. All were nominated by the miners, none of the local business men entering a nomination.

For the vacancies on the council to fill the places of Councilors Burrows and Plante, who faithfully served for several years, John Balloch and Ernest Houghton, the latter being secretary of Coleman Miners' Association have been nominated by the miners, though the name of Fred Anstrub appears on one of their nomination papers. James R. Kerr, well-known young business man and proprietor of the Tuxedo garage, is the only nomination made by the business men, whom it is felt should have a share of representation on the council. The three candidates are making their first bid for office, and it is anticipated there will be a close vote.

The term of office for councillors will be for three years, for the school trustees two years.

E. D. Battum, municipal auditor, will be in charge of voting as returning officer, and polling will close at 7 p.m. Monday next, following which the votes will be counted and the successful candidates declared elected.

As Mayor Pattinson's term continues for another year, there will be no election for the mayoralty. The polling results will be awaited with keen interest, though there are no contentious issues on school or town policies.

In Blairmore, Mayor Enoch Williams was elected by acclamation, and Evan Morgan and R. Peresini as councillors. For school trustees A. Bessett, former teacher, was elected by acclamation, and M. Krkosky and J. H. Lloyd. Sam McDowell declined to stand for re-election.

Doughty Canadians Battling for Play-off Berth in Provincial Series ---Olds Play Here on Friday

Stock in Canadians' chances in making the fourth place play-off berth in the Alberta senior hockey league rose sharply during the week, the team collecting five points out of six in their last three home games. Wins over Turner Valley and Calgary and a game with Drumheller netted the five points.

On Saturday 1300 fans saw one of the best games of the season. Practice allowed both teams to really show the hockey they are capable of, and the fans showed their appreciation by shouting encouragement.

After two scoreless periods, Redsky put Canadians in the lead early in the third period on assists by Joyce and Sanderson. Play was even during the remainder of the period until Canadians decided to go on the defensive to protect their lead during the last few minutes of play. Drumheller pressed and the breaks of the game were in their favor, when with two minutes to play, Doug Bentley shot the rubber puck deflected off Sprout's leg into the net. In overtime, Redsky again put the Canadians ahead, Sanderson and Sprout assisting, and again luck stepped in to help the Miners to score. O'Brien swung wildly at the rubber on the Coleman goal, the puck landing on the stick of Max Bentley, who scored from close-in. Swarming around the Miners' goal in the last four minutes of play, Canadians did everything but score. Kemp was in top form in goal.

Monday evening, Calgary Stampedeers found themselves outclassed in the second and third periods. Scoring six goals in the last two periods, Canadians quickly wiped out a 2-0 deficit. During the latter part of the game, one received the impression that when Coleman wanted to dominate the play and score there was nothing Calgary could do about it. Much has been written about the potential power packed in the Calgary line-up. They have appeared twice at the local arena this winter and on both occasions have been nothing but a disorganized machine. They did not know what to do with the puck. The only shining star on their line-up during this corner count was Joe Jenson, and Calgary had to come to Coleman to get him.

Bill Fraser paced the locals with two goals and two assists. Sturt, a coming big playmaker, played a grand game to gather three assists. Landak scored his first goals of the season, getting two within fifteen seconds. McKillop scored one and assisted in another. Sanderson scored once. Joyce got two assists and Sprout and Redsky assisted on Sanderson's goal.

With the form that the team is showing at the present time, Olds Elks are going to find it a tough task to beat them out of the play-off berth.

SPROUT SCOUTED BY LESTER PATRICK

It is reported that Dan Sprout, right winger of the Canadians, has had the spotlight of Lester Patrick's scouting system focused on him for the past season. Correspondence has been received by the right winger from the Patrick organization, and he is expected to meet their officials after the close of the present season. Sprout has been one of the shining lights on the local team and fans in the Pass will wish him the best of luck in his try-out at the Patrick farm school next fall.

berth. Coleman, with the two-game advantage they enjoy over the Elks, have it in their power to get into the play-offs. The issue is entirely in their hands; the fans can get behind them with support and words of encouragement.

VISITORS FROM DRUMHELLER ENTERTAINED

Following the hockey match on Saturday between the Miners and Canadians, Mr. and Mrs. H. C. McBurney entertained a buffet supper being served. Dr. T. R. Ross, who was the doctor here twenty years ago, came with the hockey team, and other guests from Drumheller were J. DeZeeuw, president of Alberta Senior Hockey League; Dave Dickson, G. Durham and E. A. Towback, proprietor of Drumheller's largest departmental store; from Michel, Dr. and Mrs. Glasgow and Mrs. Ironside, matron of Michel hospital. Miss A. Yull and Miss Muriel Naylor assisted on the hostess.

ME PLUG SMOKING TOBACCO

Canada and the Next War

If there are two questions more than any others more frequently on the lips or in the background of the minds of the great majority of Canadians, and have been since the crisis of September 1938, they are these: "When is the next big war likely to break out?" and "When it does, will Canada be in it?"

The first question presupposes the opinion that sooner or later—and generally sooner—an outbreak of hostilities on a large scale is inevitable. Certainly if a poll of the nation could be taken the consensus of opinion would be found in support of the contention that war is in the offing and this view appears to have crystallized more firmly since the Munich pact was signed.

The great majority of the people of this country hope, of course, that there will be no major conflict in which Canada may or may not become involved, but as the trend of European events and policies since the Munich pact unfold themselves, hope wears thin and yields to dubity and in turn gives place to unwelcome certainty in the minds of many.

With this state of belief prevailing the natural question in sequence is "when?" and this is a question which must await for an answer upon events yet to come and the results of policies which are now being pursued by the nations of the world, and others which may be devised and put into effect in the immediate future. In the light of the many unknown factors involved it would take more than a prophet to give an accurate and reliable answer to the question.

An Unstable Factor

If the first question must go unanswered, it appears almost as difficult to give an unequivocal reply to the other query: "Will Canada be a participant in the next general war?"

It may be stated without fear of contradiction that the majority of the people of this country do not want to participate in any war in which they would adopt the role of aggression, nor are they anxious to have to take up arms as a defensive measure, but in the latter case there may be no choice in the matter. Circumstances, over which this country has no control, might easily arise in a general conflagration, which would force the issue, so far as Canada is concerned. This is a contingency which cannot be overlooked when this question is canvassed.

Apart altogether from such questions of expediency, necessity or even moral obligation, the matter of popular sentiment is an important factor in deciding whether or not a country shall take up arms or in the alternative make concessions to the extent perhaps of great sacrifices to preserve the peace. In an algebraic equation X may be an unknown quantity but it is a stable one. Popular sentiment is not only sometimes an unmeasured yardstick but it is a variable one and subject at times to overnight change.

That this is true is shown in comparatively recent public opinion surveys made by the magazine "Fortune" in the United States, on the question whether in the opinion of the people of that country they would be involved in a foreign war. The answer was "yes" by a two to one majority in a survey made in January whereas by more than two to one a similar question was answered in the negative in a survey made before the Peace of Munich.

More significantly illustrative of the change in public opinion in a few months is the answer to the question in Fortune's January survey: "Should the democratic powers, including the U.S., now stand firm together at any cost to prevent Hitler or Mussolini from taking any more territory at the expense of other nations?" The poll, regarded as an accurate cross section of opinion, registered the following result: Yes, 56.3 per cent; No, 31.0 per cent; don't know, 12.7 per cent.

Reasonable Defence Measures

It undoubtedly affords Canadians a good deal of satisfaction to know, too, that public opinion in the United States strongly supports the comparatively recent utterances of some of their public leaders to the effect that they would not stand idly on the side lines if Canada were attacked by foreign aggressors. This, also was demonstrated in Fortune's January survey when 73.1 per cent of opinion canvassed expressed willingness to take up arms to protect Canada from invasion.

Canada was a long way from the theatre of war in the 1914-18 conflict, but in another conflict it is quite possible that warfare might be carried to the soil of this country. In such an event it would surely be humiliating to the people of this country if they had to rely entirely upon the friendly feeling of a good and powerful neighbor without being able to strike a blow in their own defence, because they had no means of doing so. With the world situation as it is to-day and the gloomy outlook overseas it would seem the part of wisdom for Canada to strengthen her defences forces to at least a reasonable extent.

Student At 60

At 60, Joseph Doherty of Chicago, is preparing for college. Doherty has just finished high school—receiving his diploma after completing his studies in the minimum time possible for evening class students. Doherty retired four years ago as a mail carrier and decided to avoid what he called desultory inactivity by going to school.

One of the few western countries where men live longer than women is Sweden.

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxyren In Your Blood and You'll Get the Pop that Sends You Bounding Up the Stairs

People who suffer from leg cramps, backache, rheumatism, and other ailments, are often told to "take the lead out of their legs." This is a good idea, but it is not always easy to do. The best way to get the lead out of your legs is to get Oxyren in your blood. Oxyren is a powerful blood-purifier and it will help you to get the lead out of your legs. It will also help you to get the lead out of your blood. It will also help you to get the lead out of your system. It will also help you to get the lead out of your body. It will also help you to get the lead out of your soul. It will also help you to get the lead out of your life. It will also help you to get the lead out of your world. It will also help you to get the lead out of your universe. It will also help you to get the lead out of your existence. It will also help you to get the lead out of your everything.

What you need is Dr. Williams' Pink Pills. They will help you to get the lead out of your legs. They will also help you to get the lead out of your blood. They will also help you to get the lead out of your system. They will also help you to get the lead out of your body. They will also help you to get the lead out of your soul. They will also help you to get the lead out of your life. They will also help you to get the lead out of your world. They will also help you to get the lead out of your universe. They will also help you to get the lead out of your existence. They will also help you to get the lead out of your everything.

The first lighted beacon on the Pacific coast of the United States was erected off San Diego, Calif., in 1855.

Lower Accident Rate

United States Reduces Accidental Deaths In 1938

The United States sliced accidental deaths to 10,300 from 1937, and the greatest improvement ever recorded in a single year, the National Safety Council announced. The provisional figure was the lowest since 1933. Accident prevention programmes were successful everywhere except in the home. For the first time in a decade home accidents exceeded the nation's traffic deaths.

The council said home accidents increased two per cent, from 32,000 in 1937 to 32,500 last year, while traffic fatalities dropped 19 per cent from 39,643 in 1937 to 32,000 during 1938. This represented a saving of 7,643 lives.

"The traffic death decline was not due to less travel for motor vehicle mileage was as great in 1938 as the year before," the council explained. Only 35 persons were killed last year in accidents involving scheduled domestic air flights compared with 57 in 1937, a 39 per cent reduction. Passenger deaths totalled 23, a rate of four deaths per 100,000,000 passenger miles.

Death from steam railroad accidents during the first 10 months last year amounted to 3,752, a decrease of 18 per cent from the 1937 total of 4,580. The council said the only increase in deaths was for passengers on trains. These soared from 12 to 65 largely because of the Montana train wreck last June.

The council said during 1938 the accidental death rate per 100,000 population was 23, a mark bettered by only six years since 1900.

Private Property

Court Decision Rendered In England Over Gas Masks

Nearly 40,000 gas masks distributed during last September's crisis over Czechoslovakia were classed as private property in a court decision in England.

A case against a man at Chesterfield was dismissed when the public prosecutor failed to establish his contention a mask was "His Majesty's property" and the defendant should be punished for damaging it. The magistrate, however, said ruined masks probably would not be replaced free of charge by the government in case of war.

Hundreds of masks have been damaged by children, otherwise responsible, worthless, or appropriated as souvenirs by tourists.

Strain Of Modern Life

Is Contributing Factor To Heart Ailments States Detroit Doctor

Dr. Henry F. Vaughan, medical health officer of Detroit, said residents of Canada and the United States are living to-day to end up as heart ailment victims. The English of modern life is a contributing factor in the high incidence of heart disease, Dr. Vaughan said. "A hundred occurrences in every life are heart strains, and if you become annoyed over some trivial matter, if you are frightened by some near accident; if you race through the day, you are putting a strain on your heart. It is very likely those experiences eventually will wear out the heart."

Safest Hands In World

Woman Works 20 Years In Antique Shop With No Breakage

No "butter fingers" are the ten digits of Mrs. Louise Allen who is in the shop of Rochelle Thomas, famed London antique dealer. Mrs. Allen's hands are the "safest in the world," according to her employers. In the 20 years she has worked for them a million pieces of rare bric-a-brac have passed through her hands without breakage of a single piece. Mrs. Allen is a 60-year-old widow.

Modest Prediction

Dr. Nicholas Murray Butler believes that New York is a generation or two may become the capital of western civilization. The president of Columbia University told the annual gathering of the Pilgrims of the United States that New York would succeed London as the English metropolis. London, he added, had plainly come to an end as the world's centre of intellectual thought and cultural prestige.

Study Winter Flying

A group of 77 "city-bred" Toronto Royal Canadian Air Force flyers will leave for the North to study practical problems arising from winter air operations. How to land in zero weather, lash down a plane in windswept "glaciers" and otherwise face adverse conditions will be studied by the men accustomed to the easier circumstances of routine aviation.

If we lived on the moon, we could see the sun and the stars at the same time.

Hungarian Partridge

Spread Of Mysterious Disease In Game Birds In Western Canada

Delegates to the 10th annual convention of the Alberta Fish and Game Association, were confronted with reports of the spread of a mysterious disease from ruffed grouse to Hungarian partridge and that "serious concern" was being caused by decline of water in lakes in many parts of western and northern Canada.

Dr. William Rowan, professor of zoology at the University of Alberta, told delegates the mysterious disease which has killed thousands of ruffed grouse in 10-year intervals has taken a heavy toll of Hungarian partridge. The disease, usually fatal, has not been explained, he said. It last occurred in 1937 and could be expected to occur again in 1947.

Bishop To Resign

Winnington-Ingram To Resign As Bishop Of London

The King approved the resignation of Rt. Rev. Arthur Winnington-Ingram as bishop of London, effective Sept. 1. He has held the post since 1901.

The bishop, who at 81 plays squash racket, said his retirement was not because he is tired of work or is failing in physical or mental vigor. "It is only fair for a young man," the bishop said.

At 75 Dr. Winnington-Ingram, playing in a hockey match for the old boys of Radley college against the school team of the day, scored three goals.

Wheat For Palestine

One thousand tons of Canadian wheat (Manitoba) and 500 tons (amber durum) are now on their way to Palestine for a miller in Tel-Aviv. In 1937 Canada exported 442 tons of wheat to Palestine. Imports of Canadian wheat into the Holy Land have varied from 227 tons in 1936 to 71 tons in 1937, and 102 tons in the seven months of 1938 ended July 31. Imports of wheat and flour into Palestine are governed by quotas which are fixed every quarter year, the quotas applying to quantities and not to individual countries.

Of every 100 persons in the Indian Empire, 68 are Hindus, 22 Mohammedans, three Buddhists, three follow the religion of their tribes, one is a Christian, and one is a Sikh.

Coal Mined In Year Would Fill Train 3,000 Miles Long

If all the coal produced in Canada in one year were loaded into freight cars and these strung together the train would reach all the way from Montreal to Vancouver, a distance of nearly 3,000 miles, according to an economist of the Canadian National Railways. Writing on mining in the Canadian National Magazine, he points out that the structural materials—cement, lime, sand and gravel, stone—in last year's mining production, would fill two strings of cars reaching from Montreal to Vancouver, and a train carrying the other non-metallics—sulfur, gypsum, quartz, salt, sulphur—would reach from Montreal to Halifax.

If Canada's 1937 copper production were cast in a block the width and height of a railway freight car the block would be nearly three miles long. A similar block of lead would be nearly two miles long and one of the zinc production would be nearly two and a half miles long. The year's silver production would form a slab a foot thick, 10 feet wide and nearly 240 feet long. The year's gold would make a block a foot thick, 10 feet wide and almost 24 feet long.

Deckle-Edge Papers

The deckle edge was regarded as an unavoidable blemish of hand-made papers by early Oriental paper makers, who cut it off evenly. With the advent of machine-made papers, deckle edges became a sign of handmade papers; to-day machines make deckle-edge papers.

Water is the basis of the metric system of weights, one cubic centimeter of water at 39.2 degrees Fahrenheit being one gram of weight.

The Gun-Barrel road of Colorado is level and without a curve for 57 miles.

Has Photographic Eye

Little Red Hen Took Electric Light Bulb As Model

A determined little Rhode Island Red hen with a photographic eye stole the show in the United States capitol.

This is the story: Farmer Albert Clark of Russellville, Ky., installed electric lights in his hen house. The Rhode Island Red spotted the bulb as she sat down in her nest. While she sat she gazed at the globe and when Clark turned off the light she flew into a feathery tantrum. When the farmer switched the light on again, she went back to her nest and presently produced her egg—the shape of the electric bulb.

The farmer sent the egg to the United States farm officials at Washington by the story.

Tuberculosis Authority

Pioneer In Treatment Of This Disease, Dies In Scotland

Sir Robert Philip, 81, an authority on tuberculosis died recently in Edinburgh, Scotland.

His ideas were adopted nationally for the administration of the campaign against tuberculosis. Fifty years ago he founded the first tuberculosis dispensary, and was chiefly responsible for the establishment of the Royal Victoria Hospital for Consumption and the Farm Colony at Edinburgh.

He was honorary vice-president of the Royal Edward Institute for Tuberculosis in Montreal.

A defendant in Chicago pleaded his case with a home-made poem. He was acquitted on the first offense and jailed on the second.

A court ruling in Sudbury, Ont., upheld the right of a man to spank his wife if she refuses to get his breakfast.

NOTES AND COMMENTS

Before the Cold Snap Came

SUCH a mild winter has provided plenty of opportunity for friendly visits. Sub-zero weather such as often experienced in these parts, is not conducive to gadding around. People naturally enjoy being sociable, and the weather plays an important part. It has enabled people from nearby towns to travel without discomfort, adding to the revenue of the hockey club. One gentleman who with his wife has spent the past few years in California or on the British Columbia coast remarked that he had enjoyed the winter here equally as well as in the more distant places. Sunny Alberta has a climate with many advantages, and winter in the mountains possesses far more pleasurable features than we at times fully appreciate.

The cold snap which set in on Sunday night has forcibly reminded us that sub-zero weather can make us glad there is plenty of coal to combat the onslaughts of the Frost King.

IT was a snappy weekend. Drumbeller Miners and Coleman Canadians furnished a splendid climax as a Saturday night entertainment feature at the arena; during which two fights among spectators took place, without serious results; one ardent "fan" became so enthusiastic in rooting for the home team that he toppled head first over the protective rail of a stairway of the reserved seat section, and after a brief lapse into oblivion came up smiling to ask if Coleman had scored. The president of the Alberta senior hockey league and other prominent gentlemen accompanying the Miners were entertained at a jolly house party, and ladies who didn't go to the hockey match played bridge to their hearts' content, or enjoyed the movies.

BYLAWS concerning transient traders and peddlers in town need a going over. Merchants and the printing office pay town and school taxes, yet little protection is given against cut-rate sales by itinerant peddlers. One instance of how the public might easily be "gypped" was related. A door-to-door peddler offered an electric razor for \$5.00, to begin with, and though the party he called on did not want to buy it, the peddler kept on chiselling the price down till it was offered for \$2.00. If it was only worth \$2.00, a profit of 150% would have been gathered in. It is people of this type who try to do business by paying a small license or none at all if they can camouflage themselves as selling through a local merchant.

MINERS nominate eight candidates for five vacancies on the council and school board; business men nominate one. Which shows that the miners take far more interest in municipal politics than do the business men, owners of stores. With so little interest on the part of the latter, they have no kick coming, no matter who is elected. Jim Kerr being the only business man nominated, and having expressed his willingness to serve his fellow citizens, entitles him to general support. That leaves the miners with four vacancies to fill. Those outside of the ranks of the miners, workers, constituting the minority, are entitled to representation.

THE Calgary Herald makes editorial reference to Coleman's agitation for a post-office building to be built by the Federal government, and in effect severely criticizes The Journal for its comment, published last week, stating as follows, in part: "Unfortunately there are many people who appear to believe that a government has a bottomless purse, while many others believe that retrenchment in public spending is highly desirable in all circumstances except where they and their community are affected."

The editor of this paper would ask the Calgary Herald if it would sit calmly and say nothing if Calgary had to put up with post-office accommodation such as it had say 30 years ago. It would be in the forefront in urging on the government the necessity of improved facilities for public service. The cities, apparently in the opinion of The Herald, should have consideration to the exclusion of the smaller towns and rural districts, which after all are the backbone of the cities in a province such as Alberta. It is from the vast area outside of the cities that they derive their business, as a series of adverse crop years plainly emphasize. When our national railways are costing the Canadian taxpayers a million dollars a week, and a small town agitates for an expenditure of possibly \$25,000, which the Federal government has received in postal revenue and other taxes hundreds of times over in the thirty-five years of Coleman's history—and will continue to receive—to criticize The Journal for its agitation—well, we leave it for others to judge! The cities should be given all; the small towns nothing. Apparently that is the view of The Herald. It will be interesting news to The Herald to be informed that the Federal government treats small towns so niggardly that the Customs office for the Pass towns is even denied the service of a telephone. How would Calgary and The Herald like that?

EVERY pay-day a large assortment of goods arrives in Coleman from mail-order houses, sufficient to make a fair-sized volume of trade for retail stores. There are many reasons. People claim that there is not sufficient variety locally to choose from, that the convenience of mail-order buying has its appeal, as it is so interesting to shop from the attractive catalogues; that they know the exact prices of goods advertised—and that merchants themselves on occasions buy from mail-order houses. There are many other reasons, but these are the most outstanding, being given in reply to a questionnaire sent out in several towns with populations of from five to fifteen thousand. Local retailers everywhere are faced with the most keen competition, which requires aggressive methods to combat. One of the best methods is to tell and sell by advertising in the weekly newspapers, which are read more closely than any other news or advertising mediums. It would surprise retailers to really know that in some of the places where the questionnaire was distributed, nearly 50 per cent of the available retail business went to mail-order houses.

PEOPLE who go out selling in competition with established business houses in town should in all fairness be compelled to pay a license in proportion to what the merchant has to pay in taxes. There are too many chisellers on regular retail stores, also the printing office.

Nearly every local newspaper from Alberta towns carried financial reports of the council and school district, thus keeping ratepayers informed. Copies of Coleman's financial reports are still available; therefore, there is no excuse in saying that you could not obtain all the details of local expenditures of ratepayers' taxes.

No sort of argument by the Journal (Edmonton) or anyone else can do away with the fact that enormous profits are being made out of Turner Valley by private interests who are only concerned about profits, and who have no regard for the interests of the people in an important and perishable natural resource. Such profits as are made from the exploitation of the people's resources should accrue to the people. Only a C.C.F. government will translate such a principle into action.—The People's Weekly.

The weekly newspaper is the family newspaper.

OUR LIVING DEPENDS ON COAL PRODUCTION ---NOT GASOLINE!

DELIVERY of goods by trucks to Coleman merchants helps to deprive the people who buy from them, (local miners) of employment. Coal miners could quickly make their opinions felt by buying from those who use the railroads, which use coal to haul freight. Every additional ton of coal mined helps to increase employment for the miners. We get our living from coal production—not gasoline! When a merchant says that it is the fault of the wholesaler, it is a lame excuse, for the buyer of goods can say how his goods are to be shipped, and if the wholesaler finds that buyers protest against truck shipments, with a possible loss of business, he will soon ship by rail.

—Published by Coleman Board of Trade.

\$450,000,000 In Ten Years

were sent out of Canada for imported coal, practically all of which went to the United States. This was the figure paid to American mines, and when railway freights from American mines to the border are added, the money sent out of the country during those ten years, would far exceed \$500,000,000, or a sum of over \$50,000,000 each year.

Had this money been spent in Canada for Coal, it would have given employment to well over 40,000 unemployed men for about eight months each year.

This is but one of many reasons why we should boost for

FAMOUS INVENTIONS

Among the more recent famous inventions announced are the following:

Eye-glasses with vertical stripes for bank tellers, so they can recognize their clients when they meet them on the street.

Ink with the spaces already in it, so you don't have to raise your pen from the paper.

A piano with the strings straight up in the air, for people who prefer to play the harp.

Bent smoke, to fit a crooked chimney.

And the bellago—a bell that, when you press the button, it rings ten minutes ago. Very useful for the telephone, but mostly for getting the firemen to your house before the fire starts.—Ex.

Alberta's Social Credit Legislature Opens Its Eighth Session To-day ---60 Bills Considered in Caucus

Edmonton, Feb. 8.—From all ridings of the province, legislature members gathered here this week for the opening of the eighth session, in three and a half years, of the eighth legislature of Alberta.

With the opening of the house set for Thursday, those Social Credit members who have not broken ties with Premier William Aberhart—or who have mended broken ties—were assembled two days earlier under orders for a party caucus, including the newest recruit, C. H. Tade, who was elected in Athabasca just before the last special session in November, but did not take his seat then.

According to advance reports, 60 bills stand ready, or almost ready, for consideration of the caucus and then of the house. All but a handful, it was explained, consist of amendments to fix up or undo acts passed during previous sessions.

The more important new bills include one to provide a provincial marketing board, through which the government is planning to go into business. There has been no indication yet as to the source of the large amount of cash which the government would have to put up, since it cannot well expect, with its record, to get much credit from producers, even for a co-operative plan.

Another bill, which may or may not get past the caucus, and then may or may not get through the house, would provide for redistribution of provincial constituencies, on some plan to be recommended by one of the numerous between-sessions legislative committees.

Legislation to provide for the bonding of lawyers, on the line of a resolution introduced in the house a year ago, also is expected to come up. The Alberta Bar Association has been drawing up plans for operation of some such scheme for itself.

The most important bill so far scheduled, from the point of view of real welfare to Alberta citizens, will be a measure to provide for participation of this province's citizens in the Dominion housing act. F. W. Nicolls, of Ottawa, dominion director of housing, was in Edmonton last week. He said flatly that only the fear, by lenders, of adverse legislation by the Alberta government has given this province the doubtful distinction of being the only one in Canada which has not benefited by the federal legislation; there has not been a single loan advanced here under the dominion's 1935 act.

Mr. Nicolls told Premier Aberhart that in a conference and, a few hours later, it was made known that the premier had given assurance that the

provincial government will bring in legislation to exempt loans under the federal act from past, present or future debt-alasing.

There has been no hint of new debt-cutting or interest-alasing legislation. There were two developments over the week end, getting down to facts, Hon. W. R. Motherwell, former federal minister of agriculture, declared publicly that most of the farm debt problem has been caused by men having been too eager in the past to use up all the credit they could get, and that realization is spreading now that a dollar should be in hand before it is spent; and the announcement in Edmonton that the Alberta board of review, under federal legislation, has reduced the debts of 2,435 farmers from \$21,000,000 to \$12,000,000.

Alberta's oil production and the government's moves to inject itself into the picture of private industry got more attention last week. At Calgary, the McGillivray royal commission was led through another week by government counsel; it is supposed to be discovering whether prices could be reduced in the Turner Valley field, but is digressed to make a study of the Illinois fields. At Edmonton, government statisticians made it known that Alberta's oil production, through private investment and initiative, attained 6,742,039 barrels last year, which was 98 per cent of the entire Canadian production, and 13.3 per cent of the total in the whole empire.

In the face of that record of production—99 per cent of it in Turner Valley—and its publicly-announced policy of seeking reduced prices, the Alberta government last Thursday suspended the licenses of eight retail oil and gasoline firms, because it was alleged that they had cut their prices below the "established" rate to large consumers.

By Saturday, four of the licenses had been reinstated, after those dealers had promised the government that they would not cut prices any more. One firm announced that it was opening up its place anyway, without a license; an executive of that firm made it known that the government itself, buying in wholesale quantities, has insisted consistently that it be given a one-cent discount, from the regular price, on all its purchases.

The consuming public and the members of the legislature will be able to draw their conclusions on the government's attitude toward price reduction, in view of the suspension of licenses, because of price reduction in retail sales.

THE SALVATION ARMY

Rev. E. B. Arrad, B.A., of Blairmore United church, will be the speaker at a special meeting at the Salvation Army hall in Coleman on Thursday, Feb. 16. Present also will be the Coleman young people's singing company and the boys' band, who recently visited Fernie, Cranbrook and Kimberley. An interesting meeting is assured, at which friends and strangers will be welcomed.—Fred Hewitt, Captain.

LOCAL NEWS

Whenever submitting copy for publication in the newspaper, use a type-writer or write plainly in order to save time. In most cases poorly written copy has to be re-written before it can be passed on to be set in type. A little co-operation in this way will save a lot of time and minimize errors. Considering the space is freely given, it is not asking too much to observe the above rules.

A shower was held on Tuesday, Jan. 31, in honor of Mrs. John Raymond (nee Grace Lochrie) in the Catholic hall, by the bride's sister, Mrs. Matt Pardoll. About 60 guests were present. An enjoyable evening was spent by playing whist and musical chairs. The prizes were won by Mrs. Jim Cousens and Mrs. E. Woods, and for musical chairs by Miss Alma Wilson. A light lunch was served and the bride was showered with many lovely and useful gifts.

Hair on the Alberta government if they can protect Alberta printers from outside competition—or, to a little further, to prevent scabbing in printing prices within the province. The latter is the biggest curse small printing shops in the province have to contend with. We venture to say that, in spite of the fact that

we are required to pay a business tax, there is not a solitary cent of protection fee collected from representatives of large city concerns who come in and take away at least 75 per cent of the business upon which the local printers have to pay a tax.—Blairmore Enterprise.

Merchants' orders for commercial stationery, counter check books, bank cheques, mercantile forms of all kinds, etc., can be filled at The Journal office by experienced workers. Support local industry and thereby help to develop more local business. The more money local workers earn, the more they have to spend in local trade. Light, water, coal, clothing, furniture, groceries, are purchased by local printers, who also pay taxes. City houses buy none of these things locally; nor do they pay a license for the business they secure from local tradespeople.

RAW

IF Your Sore, Scratchy Throat Comes from a Cold—You Can Usually Get Fast Relief by this Simple Method

1. To ease pain and discomfort and reduce fever take 2 Aspirin Tablets—drink a glass of water. Repeat in 3 hours.

2. If throat is new and inflamed, crush and dissolve 2 Aspirin Tablets in 1/2 glass of water. Repeat in 3 hours.

Often Eases Pain and Discomfort in a Few Minutes When "Aspirin" is Used

The simple way pictured above often brings amazing fast relief from discomfort and sore throat accompanying colds.

Try it. Then—see your doctor. He probably will tell you to continue with "Aspirin" because it acts so fast to relieve discomfort of a cold. And to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

Demand and Get "ASPIRIN"
TRADE-MARK REG.

WORLD HAPPENINGS BRIEFLY TOLD

The Royal Air Force has adopted a new, fast combat monoplane with underwing wings. It was disclosed. Nazi police dissolved a faith-healing sect called the "Biblical Society of Hamburg" under the law for protection of the state.

Finance Minister Reynaud declared enough gold is flowing into France to "buy, if necessary, more than 5,000 warplanes."

The United States safety council announced the country's accidental deaths were reduced by 10,300 in 1938, greatest improvement ever recorded in a single year.

Alberta treasury bills totalling \$4,478,000, held by the Dominion government as security for unemployment relief advances, have been renewed for one year.

Outright ban on importation of horses into British Columbia from any point, save by permit from an inspector under the Contagious Diseases (animals) act was proclaimed by the provincial government.

Clarence Hatry, whose gigantic financial manipulations during boom years of the 20's ended with a crash which shook the business world, was free after serving nine years in prison.

C. W. Bain, Canadian Pacific Railway land agent, said in civic court of revision the old C.P.R. Hotel Vancouver, replaced by a new hotel, to be operated jointly by the C.P.R. and C.N.R., may be torn down before next year.

Supply And Demand

The Toronto Star says Canada had \$7,000,000 pounds of butter on hand in nine principal cities on December 1. In Germany the population has been rationed down to an allowance of a quarter of a pound per week. The people of the world could have plenty of every useful product if civilization learned how to distribute what the world is capable of producing.

Sheep provide some 50 kinds of commercial furs, while cats, dogs and goats each make up a dozen or more names.

The output of British brist pipes has increased from 4,880,000 to 5,662,000 within the last two years.

Do This If You're NERVOUS

Don't take chances on products you know nothing about or rely on temporary relief when there's need of a good general remedy. Try this time-proven, natural, vegetable compound, made especially for women from wholesome plant roots.

Let Pinkham's Compound help build up your physical resistance and thus aid in raising healthy nerves, inner strength from female functional disorders and make life worth living.

For over 60 years one woman has told another how to go "rolling" thru "Pinkham's" over 1,000,000 women have written in reporting glorious benefits—it MUST BE GOOD!

The Real Lord Nuffield

British Philanthropist Is Friendly Man And Has Simple Tastes

Atticus in the Financial Post says a traveller who will arouse intense interest wherever he goes is Lord Nuffield who is off to see the Empire. His excursions in the realm of lavish benevolence have made him almost a legendary figure. If "Bentley" and "Pecksniff" have become part of the English language it can imagine that "Nuffield" may yet win a similar distinction.

Lord Nuffield is not easy to describe. Sir James Barrie might have invented him. He has the sagacity of one who is seeing things for the first time. His interest in the people he meets is real and unforgotten. Combined with these qualities is a certain helplessness which is most engaging. One would never expect to find his car waiting for him outside, and in fact, it seldom is. It sometimes doubt if he has a car. His manner suggests that while his plans for the evening have been arranged he would be willing to change them if anyone has a better idea. I would not put it past Lord Nuffield dancing on the moonlight on the grass. He has the figure for it and the temperament. In fact there is something rather wistful about him as if he has missed something in life and is looking for it in strange places.

When you talk business with him he ceases to be stative. It does not interest him to balance argument with argument. He prefers to see the possibilities without the difficulties. "There are lots of people who can tell you why a thing can't be done," he will say, "I want someone who can show me how it can be done." Whether his optimism brought him success or whether success made him an optimist would be hard to prove. The fact is that success has not isolated him from human experience. His horror of suffering, his pity for the poor, his passion for the Empire are as keen as when he mended bicycles in his Oxford shop and dreamed of the fortune to be won on the open road.

CHEERFUL AS A SUNNY MORNING!

By Anne Adams

As refreshing as the night of daffodils in spring—this very new and feminine "in and out of the house" frock that's all dressed up with the charm of ric-rac braid! Who wouldn't look sprightly and smart in those impudent little sleeves, and that youthful collar and corset waist? Instead of the open-type sleeves of Pattern 4076, you may have more bands for a still lighter effect—and smart revers with ribbon bow instead of a collar and buttons. The pockets are ever so handy when you're busy about the house. As for the making, you can rest assured that you'll stitch up this frock in no time—for the pattern, and its instruction sheet, are so easy to follow!

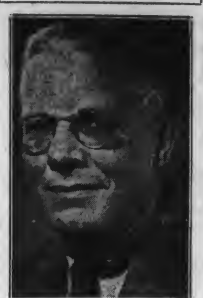

Pattern 4076 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 12 takes 3 1/2 yards 3 1/2 inch fabric and 2 1/2 yards ric-rac.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and the Number and send order to the Anne Adams Pattern Dept., Winnipeg Newsprint Company, 1715 McDermott Ave. B, Winnipeg.

Czech Loan

London—Great Britain will extend an additional £2,000,000 (about \$8,350,000) credit to Czechoslovakia, raising the total advance to £12,000,000—under the terms of an agreement reached recently.

ONE OF "VIC" REGENTS

William Zimmerman, who is a graduate of the class of '16, Victoria University, Toronto, has recently been appointed to the board of regents of that institution. Mr. Zimmerman is residing in Toronto, is a director of the McColl-Fontenac Oil Co.

Few Will Criticize

Approval Of Department Of Pensions New Policy General

There will be wide approval and little criticism throughout the Dominion for the expansion of the Government's assistance for indigent war veterans. The new policy of the Department of Pensions, announced by Hon. C. G. Power, will extend free hospital care and medical treatment to indigent veterans whose ailments cannot be attributed to war service. In the past, care of this kind has been limited to men in receipt of pensions.

For a number of years it has been generally recognized that the injuries received by those who participated in the war were by no means confined to physical wounds or to the results of illnesses contracted under conditions of active service. Scarcely anyone, who "went overseas and served in the front line, returned to Canada with a nervous system that was as good as new originally. In a few of these cases it was possible to avoid eligibility for pension, but in the vast majority of them there was no chance whatever of proving war injury. Nevertheless, any sympathetic person who has seen a number of veterans in a group could scarcely have failed to realize that their faces were those of men old before their time.

In the course of the years since the war, these injuries which were not of an obvious physical nature, have taken their toll. Nobody knows how many of the veterans who are now indigent might have made normal economic successes of their lives if it were not for nervous injuries received in war time. Nobody knows how many subsequent cases of actual physical illness among veterans would never have occurred if no nervous injuries had been received. Medical science has, however, much more aware than it was two decades ago of the connection between an individual's nervous equipment and both his economic capacity and his physical illnesses. The new policy of the Department of Pensions and National Health is a recognition of this advance in medical knowledge.

New Type Of Sheep

University Of Saskatchewan Wants Type Suitable To Western Canada

Interest in the University of Saskatchewan's work in attempting to produce a type of sheep suitable to western Canada range conditions, was evinced by members of the Saskatchewan Sheep Breeders' Association. Arthur Richardson, of Semana, president of the association, was chairman.

In his address, Mr. Richardson told of the experimental crosses between Ryeland and Rambouillet sheep at the university. He explained that work was most important, because it was necessary that the type of sheep on western ranges should be standardized in much the same manner as swine had been.

A Meaningless Phrase

The phrase, "He drinks like a fish," is meaningless in that the fish's process of gulping water is really comparable to the breathing of human beings and is simply for the purpose of extracting oxygen from the water, via the gills, just as our own lungs extract it from the air we breathe.

STOPPED IN A MINUTE...

Are you tormented with the itching torture of skin eruptions? Do you suffer from skin ailments? For quick and happy relief, use the famous "E-Z-A-C" skin medicine. It is a great skin soother, it dries fast. Stops the most intense itching in minutes. A 3c trial bottle at drug stores (5c if money back).

For Game Protection

Association To Develop Action To Preserve Wild Life

Decision to organize a council to co-ordinate and develop action for preservation of wild life was made by the inter-provincial council of western fish and game associations in meeting at Edmonton. A grant of \$10,000 from the Dominion government will be sought for the purpose.

E. B. Pittblado, Winnipeg, was elected president and T. McKay Long, Winnipeg, was named secretary of the inter-provincial association. They also represent Manitoba on the executive.

C. H. Miles, Saskatoon, and Judge A. E. Bencor, Battleford, represent Saskatchewan and Leonard E. Wise of Edmonton and W. C. Fisher, Calgary, represent Alberta. Charles A. Hayden, Vernon, represents British Columbia with another member still to be named by the British Columbia Fish and Game Association.

FORMER GRADUATE ON BOARD

M. W. McCutcheon, graduate of Victoria College, Toronto, in 1928, who has recently been appointed to the board of regents of Victoria University. He is assistant general manager and secretary of the National Life Assurance Company, Toronto.

Health LEAGUE OF CANADA presents **TOPICS OF VITAL INTEREST** by **DR. J. W. S. M'CUULLOUGH**

PASTEURIZED MILK

The Milk Nutrition Committee of Great Britain have just issued their report of the experiments made to determine the relative value of raw and pasteurized milk in the nutrition of young animals.

In some quarters there are persistent efforts being made to convince the public that animals, such as calves, pigs, rats, etc., do not thrive so well on pasteurized as they do on raw milk. All the experiments so far carried out in Great Britain, in the United States and in Canada are to the effect that animals without exception thrive if anything a trifle better on the pasteurized article.

At Reading, eleven pairs of calves from tubercle-free herds were fed for six months on milk from an accredited herd. For one-half these calves the milk given was raw; for the other half pasteurized milk from the same herd was used. The calves were weighed before and after the experiment and notes taken of their progress. The average weight for the pasteurized milk group was a little higher than that for those fed on raw milk. Towards the end of the experiment eight of the 11 raw-milk fed calves reacted to the tuberculin test. Only one of those fed on pasteurized milk gave a positive reaction.

Similar results were found from two separate experiments carried out in the United States, that there was an insignificant advantage in favour of the raw-milk group. Those carrying on the experiments have concluded that raw milk and pasteurized milk have an almost identical nutritive value for calves but that there is a considerable risk of spreading tuberculosis among calves given raw milk.

The bearing of these results on the nutrition of children seems to be identical. Raw milk as a food is about as good but no better than pasteurized milk for children. The advantage of the pasteurized article is apparent from the fact that it rarely carries the seeds of tuberculosis, undulant fever, typhoid fever and the many other infections which experience has proved to be milk-borne.

Quiet Is Essential

Going To Sleep Like Feeding Doves Says Chicago Doctor

Gaining restful sleep is like feeding doves, says Dr. Robert S. Carroll in Hygiene, American Medical Association publication. One moves around and waves his hand full of corn while little swarms, when he becomes motionless, a doubling, confiding, inquiring dove will perch on the wrist and feed. "That is the way to attract slumber," Dr. Carroll said.

"Through repose alone we would sleep. When one learns to compose the mind and body, sleep will care for itself." The doctor said that "fear of sleeplessness is an outstanding symptom of insomnia because this fear becomes mental tension and thus the thing dreaded is created in the dreaming."

Russians Buy Bananas

Bananas are being sold on the streets of Moscow for the first time since the Great War. Thousands of young people who never had seen a banana before lingered to marvel at the fruit. They stood in line to buy samples at 7 1/2 rubles a pound (about \$1.50 at the official exchange rate). The bananas came at 150,000-pound shipment from Colombia.

The highest wave, reliably recorded,

was one estimated at 80 feet, encountered in the North Atlantic during 1922.

England imports more than 42,000,000 rabbits annually.

SUNDAY SCHOOL LESSON

FEBRUARY 12

PETER HEALS A LAME MAN

Golden text: But Peter said, Silver and gold have I none, but what I have, that give I thee. Acts 3:6. Lesson: Acts 3:1-12. Devotional reading: Isaiah 35:1-10.

Explanations And Comments

Peter Shows What He Has, Acts 3:10. Nine in the morning and three in the afternoon were the hours for sacrifice and prayer. It was the ninth hour, or three in the afternoon, when Peter and John went to the temple to pray. There was always a place for prayer in the lives of the apostles. At the temple door which was called Beautiful they saw a man sitting and begging alms of all who passed. He had seen same from birth, and was carried daily to the same spot to beg. Everyone in Jerusalem must have known him. To rivet his attention upon them and arouse his expectations, Peter said to him, "Look on us." And the beggar gave heed to them. Then said Peter, "Silver and gold have I none, but what I have, that give I to thee. In the name of Jesus Christ of Nazareth, walk." "Was this some newly discovered quality and power in himself?" Phillips Brooks questions, and then he thinks of Peter as saying: "This is come to me, the power of God just then was operating through Peter's strong right arm." And immediately the man leaped up and began to walk. He entered the temple with Peter and John, all the time leaping and praising God.

Peter then took the man by the right hand and raised him up. "It was human sympathy and human happiness co-operating with divine grace. The power of God just then was operating through Peter's strong right arm." And immediately the man leaped up and began to walk. He entered the temple with Peter and John, all the time leaping and praising God.

Peter Ascribes the Cure to Christ, Acts 3:11-16. An amazed and excited crowd quickly gathered in Solomon's Porch, and Peter hastened to tell them that it was not by his own power that he had wrought this marvel, but the man had been made strong through faith in the power of Christ. He accused the people of guilt in crucifying Christ, and appealed to them to accept him as the One who fulfilled their hopes. The One promised to their fathers and foretold by their prophets. Many believed that the man was a Christian, and many were brought to five thousand.

SELECTED RECIPES

PINEAPPLE SHERBERT
1 package Lemon Jell-O Ice Cream Powder
1/2 teaspoon salt
2 1/2 cups boiling water
1/2 cup lemon juice
2 cups crushed pineapple and juice

Combine Jell-O Ice Cream Powder, sugar, and salt. Add boiling water very gradually, stirring until thick. Then add remaining ingredients. Cool and freeze in freezer. Makes two quarts sherbert.

LEMON MAYONNAISE

1 tablespoon Mazola
1 tablespoon Lemon or Canada Corn Starch
1/2 cup water
1 egg
1/2 teaspoon mustard
1/2 teaspoon salt
Dash of paprika
2 tablespoons lemon juice
1/2 cup Mazola
2 tablespoons Crown Brand Corn Syrup

Method: Mix together the first three ingredients; cook over heat till smooth and thick. Measure remaining ingredients into bowl; add cooked sauce; beat with Dover beater till smooth and thick. Serve with Spring Salad. (Yield—1/2 pint).

There are several factors which go to produce this startling result. One is the groove of daily habit, which is especially strong with most civil servants, and on retirement is suddenly changed almost completely. The other is that in many cases a sedentary man abruptly starts golfing or even more active outdoor activities. Both these are apt to be disastrous to men in the sixties.

Many religious sects still observe other dates as the anniversary of the birth of Christ, but Dec. 25 was authoritatively settled as the actual date in the beginning of the fifth century.

Caviar is being given to under-nourished children in Russia as a cure for rickets.

The liner Queen Mary has four complete radio transmitters aboard.

ICE CREAM from a wintry window-sill!

HERE'S a delicious ice cream that you can make with no trouble—at less cost than store ice cream! Mix one package of Jell-O Ice Cream Powder in one quart of half milk, half cream. Place the bowl outside your window-sill in freezing weather, stir occasionally. Jack Frost will do the rest. And how the family will praise the rich, smooth, full-flavored taste of this ice cream you've made your self! Ask for some today at your grocer's. It comes in five tempting flavors, chocolate, strawberry, vanilla, maple, lemon.

JELL-O ICE CREAM POWDER

Life In The Open

Results In Better Health And Tends To Longevity

A former London policeman, aged 92, is still drawing at 10p. In retirement, the police pension he started to enjoy in 1894. This states the London correspondent of the Ottawa Journal, is a truly remarkable and exceptional case, but the individual concerned, of course, is a man of above average strength who lived an outdoor life in his active years as a policeman.

Very different is the "expectation" of life in the case of sedentary workers. It satiated them to hear, for example, on what pensionable expectation the Whitehall civil servant's retiring allowance is actuarially based by the Government experts who work these details out. The retiring age for Whitehall is 50. The pension is based on a calculation which puts the average pensioned life of recipients at no more than two and a half years!

There are several factors which go to produce this startling result. One is the groove of daily habit, which is especially strong with most civil servants, and on retirement is suddenly changed almost completely. The other is that in many cases a sedentary man abruptly starts golfing or even more active outdoor activities. Both these are apt to be disastrous to men in the sixties.

Many religious sects still observe other dates as the anniversary of the birth of Christ, but Dec. 25 was authoritatively settled as the actual date in the beginning of the fifth century.

CHAPTER XII.—Continued

At last it was over. Jack Hammond walked dully away. A few months before he had waded hip-deep in the waters of Lake Superior, to welcome this girl as his fiancée. Now, in a gambling house, he had stood as a witness while she married another man. His eyes fell on the roulette wheel. Life and roulette, a turn of the wheel, a bet placed at random, a call of the croupier announcing the loser.

Life and Roulette, a Turn of the Wheel

Behind him, Jack Joyce was sobbing, the frontier nurse beside her as she knelt against Bruce Kenning's cot. There was little need for gentleness. Kenning was all but beyond pain. Hammond raised a hand to his throat. He left the room.

After a time, around the World Annie came out into the entrance where Jack stood talking at random with the sergeant.

"Well, the guys kicked over," she said. "Funny she'd want to marry him, ain't it? And him dying—"

That night, Hammond saw Jack Joyce again, in the hallway of Annie's pavilion. Some of the dullness was gone from her features, giving way to the flare of her always easily aroused anger. Around the World Annie stood at the window, watching the flicking of a snow flurry against the pane.

"And I don't care what you say about it," Annie spat; "the thing was mine and I did what I pleased with it."

Hammond halted an instant, then started on toward the gambling room in search of Jeanne. Annie called him back.

"You're mixed up in this. What about them claims you signed over to Bruce Kenning?"

Hammond looked at her. "Well, what about all good?"

"Were they any better?"

"Why ask?"

Around the World Annie breathed deeply, bulging her ponderous bosom. "Me 'n' Jack Joyce have got an argument on about them. She says they're hers."

ACHING COLDS

Relieve Their DISTRESS
This Easy, Quick Way!

Don't take chances. Rub on soothing, warming Musterole. Relief quickly follows.

Musterole gets such fine results because it's NOT just a salve. It's a "counter-irritant"—causing, warming, stimulating and penetrating—helpful in quickly relieving local congestion and pain.

Used by millions for 30 years. Recommended by many doctors and nurses. Made in Canada, in three strengths: Regular Strength, Children's (mild), and Extra Strong. Approved by Good Housekeeping Bureau, All Druggists, 40¢ each.

Hammond pressed his lips. "I guess they are," came finally. "She married Kenning for them."

Annie started.

"Did you?" she asked the girl. "Why marry a guy for a bunch of no-good claims?"

Key Joyce only stared.

Hammond said dully, "But they were worth millions, Annie."

"Millions?" she put a hand to her head. "Did you say millions?"

"That's the indication."

"My Gawd!" the woman gasped. "And I—"

Hammond gestured futilely. This was becoming involved.

"Then you've got a lien against them for ten thousand dollars. But Kay inherited them when she married Kenning."

"That's what I've been trying to tell her," the girl snapped. Annie cut her off.

"Lien, hell. Those became mine when he signed 'em over to me. He said he was coming back the next morning. He didn't come back. And I wanted to get these frontier nurses a little present. They're swell gals. But my Gawd, I didn't know I was passing 'em out a whole good mine!"

"You had no right to give that away!" Kay Joyce cried. There was desperation in her voice. Annie faced her, suddenly seething.

"Listen, Baby! I gave it to 'em and I ain't squawking. Let's see if you've got the same amount of guts."

"But it's not fair. It was what I wanted to live on. That's what I married him so—he could look after me. Don't you see—"

"Kay, Kay!" she gestured weakly. "I haven't anything. What in the world will become of me?"

"Oh, you'll live," said Annie. "Is the transfer recorded?" Hammond asked.

"Teh," Annie panted for a cigarette. "I thought it'd be bigger if I told 'em to do that. One of 'em went down to the office as soon as the tent had been put up again."

Hammond shrugged his shoulders. "I guess that's the end of it."

Kay cried.

"No, it's not the end of it! I'll fight for what's mine—if I have to—"

"Wait a minute, Baby," said Annie. "A dame like you ain't going to take nothing away from the frontier nurses. Not with a jury of miners doing the deciding. 'Specially when they know all the crookedness there was mixed up in it."

Hammond straightened. A fortune had been taken from all his possible hopes of possession. Now he was about to clinch the argument that would take it from another.

"Besides, Jack, Lew Snade is still alive. I'm afraid he'd testify for anybody but Bruce Kenning."

Sergeant Terry had strode into the anteroom and stood silent by. Now he scratched a match and talked over the side of his black pipe.

"Kenning tried to murder two men, Miss Joyce," he said. "Lew Snade is one. Hammond here's the other. More than that, he set fire to the bush, which is a good deal worse. I don't believe I'd resort to law."

The girl seemed to wilt.

"But what am I going to do? Can't you understand? I haven't a thing! How will I live? How will I exist?"

"You still have half of the properties Kenning and I owned," Hammond interjected. "For that matter, you can have all of them—I'm going over the hill."

Three days later, Jack Hammond walked down to the lake with Jeanne Towers. A plan had just come in, one of the last of the season, until the lake froze, permitting the landing of ships on skis. Timmy Moon crawled out of the cockpit.

"Got a letter for you, Jack," he said.

"A pilot gave it to me down at Fourteen."

Jack took the envelope and stared at the pencilled writing. Suddenly his hands began to shake. With a quick, jerky motion, he tore off the end and pulled out the rough, lined sheet of paper within. The words blurred for a long moment, at last to clarify:

Cameron Bay, Great Bear Lake, Northwest Territories.

Dear Jack:

A fellow just flew in from down your way and said there's been hell to pay all around. Well, Jack, I guess that's what makes a mining camp.

I thought I'd get this off by the pilot. He's hopping back this afternoon. If things don't turn out all right, and that girl has really done what this fellow says she did, what we throw our grub in the same truck sack again? This is sure God's country down here at the Arctic.

Why, I know a place where there's enough rich stuff to set fellow crazy. I never seen such a country; why it makes Sapphire lake look like a two-spot. You and me could go wild finding stuff here, Jack. Why there's a regular wall of quartz, stretching off into the barren lands. God knows where. There ought to be enough gold in it to make a man rich.

Say, I hope this fellow didn't tell me all wrong about what happened down there. But if you are all through with her and everything, what say you do what you've really been wanting to do. Now that sounds funny, but everybody could see it but you—you know, see if you can't get the girl you are really crazy about.

Well, partner, come right to Cameron Bay if you do come up. If you do ask Jeanne and she says she'll come with you, I'll be awfully glad to see you.

Good luck to you, Partner.

Yrs., Joe.

P.S. Be sure to ask Jeanne.

Wordlessly he read it again. Wordlessly he handed it to the girl. Her lips began to tremble as she read it. Finally she looked up, her eyes misty, strangely eager.

"Well," she said brokenly, "are you going to ask me?"

"A pilot gave it to me down at Fourteen."

Jack took the envelope and stared at the pencilled writing. Suddenly his hands began to shake. With a quick, jerky motion, he tore off the end and pulled out the rough, lined sheet of paper within. The words blurred for a long moment, at last to clarify:

Local News

Mr. and Mrs. Frank Celli, of Creston, were the guests of their son Floyd, during the week-end.

Coleman badminton club will hold their annual dance in the Grand Union hotel on Friday, February 17.

Coleman Cubs, under the supervision of their leaders, sold numerous bags of candy on Saturday which netted them a nice profit, the money to be placed in their uniform fund.

The death occurred at a home on Sixth street this morning of Augustus Maufort, aged 72 years. Deceased had been for many years a rancher in the district north of Cowley.

Unfortunately cold weather prevented a good response to the invitation to visit the schools during Education Week. However, if the weather moderates to-morrow, there is still opportunity to visit the schools.

Studebaker-Pontiac Bonspiel Here On Monday—Cole's Theatres Cup For Third Competition

Curlers from Bellevue, Blairmore and Coleman will gather at the local arena on Monday morning for the start of the annual Studebaker-Pontiac bonspiel.

Of added interest this year will be the competition for Cole's Theatres Cup, a trophy which was donated by Mr. Cole only last week. He will also support the trophy with prizes. This trophy will be recognized by Pass curlers as representing the Bellevue club, in the same manner as the Pontiac represents Coleman and the Studebaker the Blairmore club. The inclusion of this trophy means that Bellevue will now secure the 'spiel every three years.

There will be two main competitions and a consolation event. The cup for the consolation will be that of the club sponsoring the 'spiel, which this year will be the Pontiac. All rinks failing to enter the fours of the two main events will be eligible for the consolation. Entry fee is \$4.00 per rink. Local curlers are urged to enter a large number of rinks.

What Is A "Perfect" Milk?

We shall tell you from time to time in these columns what we are doing under scientific guidance from various authorities to make up the deficiencies in food constituents in this district.

You will be surprised.—Meadow Sweet Dairies Limited.

Wednesday's Hockey Scores

Lethbridge 7 Coleman 4
Turner Valley 5 Calgary 0
Olds vs. Edmonton, postponed due to cold weather.

Card of Thanks

Robert and Howard Campbell wish to thank one and all for their kindness and help shown to them during their recent sad bereavement, in the loss of their dear mother.

In Memoriam

GRAHAM—In Loving Memory of a dear husband and father, William Graham, who was gassed in McIlwray Mine on February 11, 1935.

We often think of days gone by
When we were all together;
A shadow o'er our lives has cast,
Our loved one's gone forever.
—Ever remembered by his loving wife and family, Mary, Billie and Peter.

Students of the Northwestern University have decided to run a boycott of razor blades and shaving creams until the examinations are over. Their whippers will simply have to grin and bear it.

Good quality bond paper, white, 8 1/2 x 11 inches, 500 sheets in cardboard box for \$1.35, at The Journal.

NEED 3,000-MILE TRAIN

TO CARRY CANADIAN COAL

If all the coal produced in Canada in one year were loaded into freight cars and these strung together, the train would reach all the way from Montreal to Vancouver, a distance of nearly 3,000 miles, according to an economist of the Canadian National Railways.

Writing on mining in the Canadian National Magazine, he points out that the structural materials—cement, lime, sand and gravel, stone, etc.—in last year's mining production, would fill two strings of cars reaching from Montreal to Vancouver, and a train carrying the other non-metallics— asbestos, gypsum, quartz, salt, sulphur—would reach from Montreal to Halifax.

If Canada's 1937 copper production were cast in a block the width and height of a railway freight car, the block would be nearly three miles long. A similar block of lead would be nearly two miles long, and one of the zinc production would be nearly two and a half miles long. The year's silver production would form a slab a foot thick, 10 feet wide and nearly 240 feet long. The year's gold would make a block a foot thick, 10 feet wide and almost 24 feet long.

THIS WEEK'S STORY

One night this week, Charlie Watson was telling his young son, Billy, a few tales of yesteryear and how the wind used to blow around Fort Macleod in the early days.

"There were no automobiles when I was courting in Macleod those days," said Charlie, "but I went about with just as much speed as you would see out here on the highway today. I put sails on an old broken-down C. P. R. hand-car every night, and the wind would around Macleod blew so strong it would carry me over to my sweetie's house at the rate of a mile a minute."

"What did you do when the wind blew in the other direction?" asked son Billy.

"Oh, that was easy," said Charlie. "I just went the opposite direction and called on another girl!"—Stavely Advertiser.

PRESS DICTATORSHIP

Dr. Warwick Kelloway: "I think I can understand now why the present provincial government passed a bill to insure accurate information. I can understand and also sympathize with it, for there can be a kind of dictatorship of the press which is not in accordance with the spirit of true democracy."

"But just the same, I do not agree with government censorship of the press, for that might easily develop into still another and worse kind of dictatorship."
